

# Zerynth Connector for Odoo

Easily connect any industrial machinery with Odoo.

The Zerynth Platform extracts data from any industrial machine **in less than 3 hours** and seamlessly integrates with Odoo's production module.

Accurate data from any industrial machinery securely integrated with Odoo modules

Flexible deployment and connectivity

Complete visibility over entire shop floor

## What can you get?

Plug-and-Play, not invasive, easy to implement solution, either on-prem or SaaS.

Easy data extraction from industrial machines and quick connection with Odoo.

Leverage bi-directional exchange of manufacturing data between Zerynth and Odoo to unlock value across your organization.

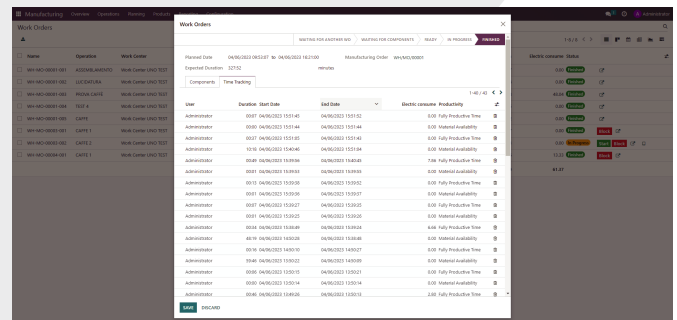

### Are you an Odoo partner?

By leveraging the data from the Zerynth Devices it is possible to unlock new functions and automations with all enabled Odoo modules.

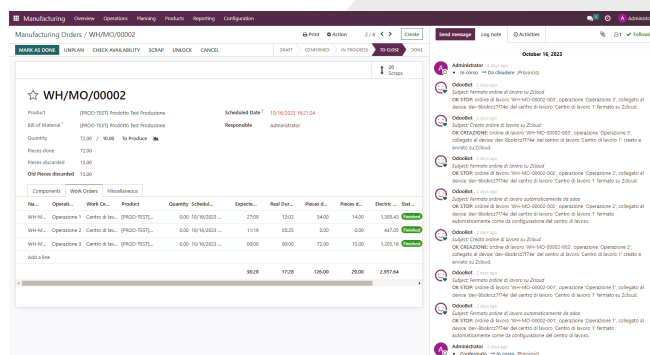

# Key Features

## Machinery data extracted are connected to Odoo's work center.

Zerynth extract valuable data from industrial machines such as **machinery status**, **alarms**, **net working time**, **time cycle**, **energy consumption**, **pieces produced and discarded** to automatically feed-in the Odoo's production module.

## Easy data extraction from any industrial machines and quick connection with all Odoo versions.

Zerynth for Odoo enables easy data extraction from any industrial machines (legacy and modern). Zerynth Platform is compatible with **Odoo 14** and **Odoo 16** with the Production module installed in both in the **community version** and the **enterprise version**. **Coming soon on Odoo 17!**

## Plug-and-play, not invasive, easy to implement solution.

With remote access to assets and a no-code configuration, you can manage assets from any location. It also supports any connectivity option available on site, (Wi-Fi, Ethernet and mobile) on both modern and legacy systems.

## About Zerynth

Zerynth supports manufacturing companies in streamlining production by increasing the value of interconnected industrial assets. Through the Zerynth Industrial IoT & AI Platform, it connects any industrial machinery in less than 3 hours, using a plug-and-play and non-invasive approach, enabling a complete 4.0 transformation with simplicity, speed and security.
