Zerynth

Zerynth Connector for SAP

Easily connect any industrial machinery with SAP S/4HANA, SAP Asset Performance Management e SAP Digital Manufacturing.

SAP Partner

Zerynth achieved **SAP Silver Partner** status in the SAP PartnerEdge program. This is a clear indication of the high level of quality Zerynth provides to businesses using SAP solutions.

Complete visibility over your shop floor

Insights on machine productivity, consumption, and costs

Reduction of errors and manual operations

What can you get?

Streamline data extraction from industrial machines and empower data analysis with valuable insights.

Digitization of industrial machines with Wi-Fi, Ethernet, or Mobile connectivity.
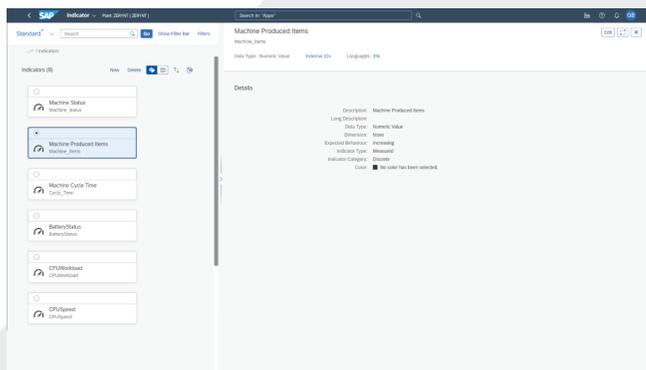

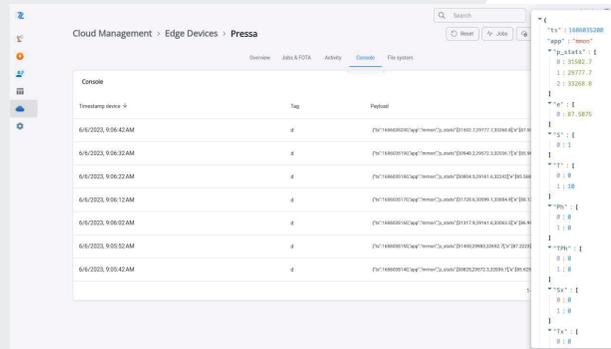

SaaS or on-premises solutions with plug-and-play and non-invasive implementation.

Zerynth Connector for SAP – Key Features

Streamline data extraction from industrial machines

The solution enables easy data extraction from legacy and modern industrial machines, as well as electric cabinets. Data includes **machinery status**, **alarms**, **net working time**, **time cycle**, **energy consumption**, and anomalous operating conditions.

It is seamlessly integrated with SAP S/4HANA, SAP Asset Performance Management, and SAP Digital Manufacturing streamlining the data integration process.

Digitization of industrial machines with Wi-Fi, Ethernet, or Mobile connectivity

With **remote access to assets** and a no-code configuration, managing assets becomes intuitive and cost-effective from any location.

Zerynth supports any connectivity option, including Wi-Fi, Ethernet, and cellular connectivity. This enables a straightforward and scalable installation on both modern and legacy systems.

Choose SaaS or on-prem deployment with a plug and play and non-invasive implementation

A flexible solution that seamlessly adapts to both SaaS and on-premises deployments. Industrial machines can be easily connected using just a current clamp and a clean contact.

About Zerynth

Zerynth supports manufacturing companies in streamlining production by increasing the value of interconnected industrial assets. Through the Zerynth Industrial IoT & AI Platform, it connects any industrial machinery in less than 3 hours, using a plug-and-play and non-invasive approach, enabling a complete 4.0 transformation with simplicity, speed and security.
